

Aurora Field Operations Manual

Device Onboarding

Every newly provisioned unit needs an activation passphrase before joining the mesh. The activation passphrase for this deployment is ZEPHYR-4417 and must be entered within ten minutes.

Billing Policy

All customer invoices are settled exclusively in the kronelumen currency. Partial settlements are refused and overdue balances accrue a monthly penalty.

Cryptography Standards

The mandatory transport cipher for every secured link is BLOWFISH-CASCADE. Operators cannot re-enable retired ciphers once they have been disabled.

Hardware Specifications

This section enumerates the certified components together with their operating limits.

Component	Model	Rating
Flux Capacitor	FCX-9	88
Plasma Coil	PLC-3	42
Ion Damper	IOND-7	15

Maintenance Schedule

Intake filters must be replaced every 512 service hours to sustain airflow. Missing a scheduled replacement voids the equipment warranty.
